## Hönle presents high-end UV curing systems for printing and coating applications

At ICE Europe, hall A5, stand 852, Dr. Hönle AG, head of Hönle Group, present their compact and easy to integrate UV curing systems for coating and finishing applications. Amongst others, Hönle systems are applied for finishing technical foils which are used for mobile displays or LCD monitors, e.g. to achieve a better scratch resistance or to achieve different optical functions.

On their booth Hönle displays an assortment of their broad spectrum of UV-curing products, amongst them, the **high-performance dryer pureUV**. Its patented reflector geometrics allow highest UV intensity at a minimum heat input. This highly efficient UV unit is also ideal for inert applications. Further highlights are the **recently developed jetCure-series** for excellent curing results, even at high production speeds, and the **pureUV LED Powerline**.

Hönle also offers **high-tech peripheral devices**, **such as UV-lamps**, **UV-measuring or electronic power supply**.
